**AMEDD AVS**

**Joint Federal DS Working Group**  
**8 June 2004**

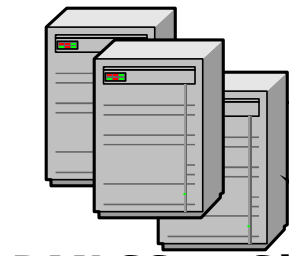

# AVS (Audit, Value, Sourcing)

- Audit
  - System checks and enhances site records
  - Identifies records that need work
- Value
  - System matches site records to the Business Intelligence Warehouse (BIW)
  - Identifies lower product prices and opportunities to move from manual to e-Commerce sources
- Sourcing (future)
  - Readiness application
  - To be based on AF prototype

# AVS User Interface

- All web-based
- System design based on pilot project experiences over an 18 month period
  - Lots of “lessons learned”
- What users see is just the “front end”... lots going on “behind the curtain”!

# Behind the Curtain

**DMLSS @ Sites**

**Site System Analyst**

Queries are executed by ZAXIS to pull required files from sites. Future: Automated feed (SCR in draft)

Support files refreshed monthly from DSCP and other sources to the BIW

After User Interface review, site personnel update DMLSS with new source and catalog information for accepted recommendations.

Future: Analysis piece sends formatted 832 or similar transactions to update DMLSS.
